COMP 1017: Elements

The following is a collection of all of the elements (tags) we'll learn throughout the course, as well as when we'll learn them[1].

Day 01

<!DOCTYPE html> [2]

<html>

<head>

<title>

<body>

<h1>

<p>

Day 02

<h1>, <h2>, <h3>, <h4>, <h5>, <h6>

Day 03

<img/>[3]

➔ **attributes**: src, alt

<a>

➔ **attributes**: href

,

Day 04

<table>

➔ **attributes**: border

---

[1] This is based upon a fifteen week term.
[2] This is technically a declaration.
[3] This is our first void-element.

<thead>, <tbody>, <tfoot>

<th>, <td>

➔ **attributes**: colspan

<figure>, <figcaption>

Day 06

<header>

<main>

<footer>

<hr/>

Day 07

<section>

<aside>

<nav>

<article>

<div>, <span>

Day 13

Here, we learn about .classes. We do not use #IDs or !important in Web Fundamentals I.

Day 24

<form>

➔ **attributes**: action[4], method

<input>

➔ **attributes**: type

<textarea>

<label>

<button>

---

[4] Because we are exclusively focusing on the front-end and aren't actually setting up anywhere for the data to go, we will be leaving this value blank. This may throw a validation error.

We do not learn (and actively discourage!) the following:

➔
➔ <marquee>
➔ <b>, <i>, <u>, <s>
➔ <center>, <font>
➔ <frame>
➔ [Using HTML for layout purposes](#)
